

## CHINESE PISTACHIO

The **Chinese Pistachio** (*Pistacia chinensis*) is a small deciduous tree to a height of approximately 5-7 metres.

This species is well known for its extremely fine glossy green leaves consisting of up to 10 pairs of leaflets, which in autumn turn a bright crimson colour. The inconspicuous flowers in clusters are followed in summer by small red spherical seed pods that turn blue in autumn, and attract birds.

**Note:** Young trees can be viewed in **Whitney Street, Cheltenham, Telford Street Ovingham, Princes Street Croydon and Laurie Street Kidman Park**

## EUROPEAN HACKBERRY

The **European Hackberry** (*Celtis australis*) is a medium sized deciduous tree which grows to a height of 12 – 15 mtrs.

Small ovate to elliptical leaves with toothed margins are dark green in colour, which turn yellow in autumn.

The tree has small fleshy fruits (drupes) which turns purple-black in autumn. It's often used as street and shade tree in public areas.

**Note:** Mature trees can be viewed in **Wattle Street, Brompton, Lewanick Street Allenby Gardens.**

## RED FLOWERING YELLOW GUM

The **Red Flowering Yellow Gum** (*Eucalyptus leucoxylon* 'Rosea') is a medium sized Australian Native tree which grows to a height of approximately 8-12 metres and has a spread of 5-7 metres.

The grey-green leaves are 80-150 mm long and the bark is light grey to white in colour and smooth.

Pink to red flowers develop from buds in groups of three with a 10 mm conical cap from spring to summer.

This tree is drought and frost tolerant and is suited to coastal positions. It is useful for ornamental, windbreak and street planting.
